***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to an electropolishing apparatus, classified in class 204, subclass 224M.
- II. Claims 4-6, drawn to an electropolishing method, classified in class 205, subclass 640.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus (invention I) could be using to mechanically polish a workpiece (i.e., power supply not being used), which would be a materially different process than the electropolishing method of invention II.
